OBJECTIVE

Intend to build a career with a professionally managed IT corporate in the company of committed and dedicated people, which will help explore and realize my potential. Willing to work as a key player in a challenging and creative environment.

SUMMARY OF EXPERIENCE

- **17 years 8 months** of IT industry experience encompassing a wide range of skill set and roles.
- Working as **Engineering Manager** from last **4 years 4 months**.
- Handling three teams: RSDC, SADB and AI Team.
- Leading the team of **24** members and helping them in their day-to-day work in removing impediments and suggesting ideas and assisting the RSDC and AI Team technically also.
- Work on Program Increment planning, capacity planning and timely execution.
- Ownership of Budget planning of my Org working with manager and EMs.
- Launched **AI Team** in my Org and working on various **AI use cases** working with several stakeholders like Advanced Analytics Team etc.
- Have always driven the Team in case of **Major Incidents** across multiple time zones to adhere the **SLA** for the customer.
- Leading the backend team and interacting with **GreenLake** Team to enable the support experience in the portal.
- Have been working with the team members closely to build a strong team looking at the skill sets, coming up with various tools for the smooth running of the application and teams there by encouraging **culture of Innovation**.
- Working with the **resource vendors** in filtering, evaluating the candidates to bring the **right talent** for the team growth including SOW review and budget discussion.
- Working with SM, PM, PO and Team for **Future Connected strategy** for our solution.
- Pursuing **AI for Managers** Certification Course from **IIM Bangalore**.
- Completed **MBA in Business Analytics** from **BITS Pilani(WILP)** last year.
- Completed certification on **Selling Through Customer Centricity Experience** from **Wharton School**.
- Completed certification on **Driving Digital Transformation Experience** from **IMD**.
- Worked as **Scrum Master** of RSDC, SADB Application.
- Working with **Vendor Microsoft** for Biztalk engagement to identify the performance improvement and health check and **vendor Biztalk360** for helping the L3 support team with the monitoring tool.
- Having frequent interaction **with L3 Support leaders (being the immediate indirect Customer)** to understand their pain points and proactively refining the approach to avoid escalations.
- Working closely with Manager to groom the team members for making a high performance agile team and suggesting **trainings requirement** and **areas of interest**.
- Work also involves **Agile Process** Implementation, coaching and continuous improvement as part of Development R&D team.
- Have **SAFE 4.6 Scrum Master** Certification

- Have done **SAFE 4.0 Product Owner/Product Manager** Course, **Leading SAFE 4.5** course
- Extensive expertise in designing, coding and testing of stored procedure and Web applications using Microsoft Technologies (**Sql Server,ASP.NET , C#**)
- Good working knowledge on **Oracle, PL SQL, Python Scripting.**
- Extensive experience with analysis, design, development, customizations and implementation, testing of software applications.
- Proficient in analyzing and translating business requirements to technical requirements.
- Strong database skills, Object Oriented Programming and development knowledge
- Involved in software projects for Services Industry and Product Company.

PROFESSIONAL EXPERIENCE

Organization: Hewlett Packard Enterprise/HP
Duration: Aug 2014 – Till Date
Designation: Engineering Manager and Other Roles
Responsibility: Handling Three Teams: RSDC, SADB, AI Team

- Managing team of **software/AI** engineers following **SAFe Agile** methodologies.
- Collaboration with several stakeholders internal and external to the Org.
- Cross Functional Collaboration with HPE Greenlake, Global Remote Support etc.
- Part of the **Connected Strategy** Team includes travel to Ireland to work with Product Management Team.
- Regular interaction with **GreenLake Team** for enabling the support experience in the portal.
- Working on **AI Strategy** for our org with Solution Manager and other Engineering Managers like some of the use cases being case identification and event classification via predictive analysis and noisy device anomaly detection.
- Working on other AI use case with several stakeholders like Text to SQL, WikiAssit , Intelligent Case Routing etc.
- The focus is to accelerate **AI and automation** to drive business growth and service margin.
- Lead the **modernization** of my applications and infrastructure to HPE Private Cloud COLO environments.
- One of my applications **SADB** is containerized and uses the **Kubernetes** cluster and have **CI/CD** pipeline using **Ansible** tool and scripting with automated deployment and POC is going on to enable other Microsoft Application RSDC to be containerized and get the benefit of automated deployment and scalability.
- Always work with my peers to explore the opportunities and work together and see how we can increase our **adoption of Client** (OVRs) so that we can support more customers with support automation.
- Always work on the sense of **Ownership** model with each team member.
- Being a people manager, ensure that a constant **connect** with the team is happening.
- Mentored the team for a Volunteering Event where got the recognition of **most impactful** award at the global level.
